HAMILTON

Hamilton Air Courier Point-to-Point System

Easy to operate, affordable and easy to install, the Hamilton Air Courier Point-To-Point System saves time and increases security when the need arises to move currency, coins or papers from one station to another. Simply place the items in the carrier, close the door and push the send button. It's that easy.

- **Time Saving.** The Courier Point-To-Point System moves a carrier faster than any messenger and eliminates the need for a manager to supervise the transportation of high-security items such as cash or coin.
- **Added Security.** Almost impossible to intercept, the Courier Point-To-Point System travels quickly and quietly from one secure area to another.
- **Built to Last.** Made of tough, high-impact plastic and other durable parts, the Courier Point-To-Point System will withstand hard use and require little or no maintenance.
- **Soft Landings.** The safe arrival of the contents are important, so the Courier Point-To-Point System assures gentle arrival of the carrier into both the send and receive station.

HAMILTON
