

# BranchServ ATM & ITM/Advanced Terminal Portfolio

*Innovative Automation and Branch Transformation Solutions for Your Financial Institution*

ATMs and ITMs (advanced terminals) from BranchServ and Nautilus Hyosung are based on modular design and open architecture to ensure compatibility and scalability for all financial institutions. Across the line, our state-of-the-art technology allows you to transform your branches both inside and out. We are focused on providing real solutions that support a seamless migration of transactions from the teller line to self-service in support of optimal branch efficiencies and consumer satisfaction.

## All BranchServ ATMs and ITMs/Advanced Terminals Deliver Industry Leading:

### FUNCTIONALITY

Whether you are looking for full or advanced functionality, BranchServ delivers. Our solutions have extensive capabilities, and capacities will accommodate even the busiest of branches. Ultimately, BranchServ supports optimization of the customer experience by providing the very best in self-service equipment for financial institutions nationwide.

### TECHNOLOGY

Our Windows 10 enabled technology provides multiple configuration and integration options with consideration for your core and ATM rail. A dual-host solution provides 24/7 self-service access and support for 95% of typical transactions, and both customers and non-customers benefit from the technology.

### DESIGN

BranchServ and Nautilus Hyosung design ATM and ITM offerings to fit both the technological and the physical needs of your branches. We therefore offer a range of sizes and configurations with a consistent emphasis on both appearance and user-friendliness. Open architecture and modular components facilitate more efficient upgrades so that your branch network can evolve as needed.

### RELIABILITY

Ease of maintenance and simplified service ensure optimal uptime for all ATMs and ITMs in the BranchServ line-up. All machines are designed and engineered with the quality and craftsmanship you have come to expect from our partner, Nautilus Hyosung.

### SECURITY

All machines leverage a series of physical and logical defenses against attack. This includes multi-level anti-skimming, operating system controls, white listing, encryption, tested hardware and more. Furthermore, video and monitoring integration is simple.

***Finding the Best Fit for  
Your Financial Institution***

**Multifunctional ATMs**

*For Strong Multifunctional Performance*

<b>Product Options:</b>	<b>7600XL, 7600DAXL</b> (Drive-Up), <b>7600TAXL</b> (Thru-The-Wall)
<b>Technology:</b>	Windows 10 Enabled
<b>Functionality:</b>	Full Functionality with: ■ Cash Acceptor, ■ Check Scanner, ■ Envelope Depository
<b>Design:</b>	Attractive Design with Multiple Configurations

<b>Technology:</b>	Windows 10 Enabled
<b>Functionality:</b>	Baseline Functionality and Value Offering
<b>Design:</b>	Compact Design with Multiple Configurations

## Advanced Terminals

*For Industry Leading Innovation with a Self-Service First Philosophy*

<b>Product Options:</b>	<b>8800,</b> <b>8200QT</b>
<b>Technology:</b>	Windows 10 Enabled
<b>Functionality:</b>	Advanced Functionality with: <ul style="list-style-type: none"> <li>■ Self-Service First Configuration for Optimal Transaction Support</li> <li>■ Cash Recycling, Tablet Compatibility, Video (Active Teller), Biometrics and Much More</li> </ul>
<b>Design:</b>	Intuitive Technology and Modern Design for Optimal Customer Experience

## Hybrid ATMs

*For Forward Thinking FIs*

<b>Product Options:</b>	<b>7800D</b> (Drive-Up), <b>7800T</b> (Thru-the-Wall), <b>7800i</b> (Island)
<b>Technology:</b>	Windows 10 Enabled
<b>Functionality:</b>	Scalable Technology for Future Proofing: <ul style="list-style-type: none"> <li>■ High Cash-Dispense Capability and Support for Large Mixed Media Deposits</li> <li>■ Easy Transition from Full to Advanced Functionality with Cash Recycling, Tablet Compatibility, Video and More</li> </ul>
<b>Design:</b>	User-Friendly Technology and Modern Design with Multiple Configurations

## Software

### MONIVIEW

MoniView from Nautilus Hyosung provides the necessary functionality to keep your ATMs at peak availability, supporting:

- Status monitoring
- Remote configuration and software distribution
- Remote resolution capabilities
- Dispatching
- Reporting

### MONIGUARD FOR WIN10

MoniGuard from Nautilus Hyosung is a suite of security products that prevents a wide variety attack vectors within the ATM software stack including:

- Hard Drive Encryption (HDE) to prevent the removal and/or swapping hard drives
- Whitelisting to limit authorized executables to run on the ATM

And third-party integrations can ease the implementation and maintenance burden for financial institutions.

### MONIMANAGER

MoniManager allows you to optimize ATM operations with features that include ATM status monitoring, fault management, journal and transaction management, and SLA reporting.

## Support

### PROFESSIONAL SERVICES

BranchServ partners with banks and credit unions nationwide to support branch optimization, transformation and design. We are a trusted advisor and provide:
